23. Other Dwellings, Total Number and Percent of Total Dwellings, Alberta, Edmonton Metropolitan Region and Municipalities, 1976, 1981 and 1986 31

i. introduction

I. Introduction

1. Purpose of the Report

In the course of conducting its business, the Edmonton Metropolitan Regional Planning Commission finds frequent need for up-to-date demographic information for the planning region and its member municipalities. These municipalities and their locations are shown on Map 1.

In addition to its own requirements, the Commission is often asked to provide demographic information to its member municipalities, government departments and agencies, professionals in related planning fields, the business community and the general public. The Demographic Studies series of four reports addresses these information needs.

Report No. 1, Municipal Population Profiles, and Report No. 2, Comparative Population Statistics (published in July, 1988), provide basic population data for the Region and its municipalities for the period between 1961 and 1986. Vital statistics from 1971 to 1986 are also included. Report No. 3, Family Household and Dwelling Characteristics - Municipal Profiles - presents selected census information about the Edmonton Metropolitan Region's families, households and dwellings for the years 1976, 1981 and 1986. These data are arranged in a profile form for each municipality of the Region. The present report, Report No. 4, entitled Family, Household and Dwelling Characteristics - Comparative Statistics, contains the same types of data as Report No. 3 but in a different format which is suitable for easy comparisons among the Region's municipalities.

2. Content of the Report

The report deals with such topics as: total number of families and children at home and their changes between 1976 and 1986; different family types and their characteristics; total number of households, households by size and household income; and, number of dwellings, tenure and dwelling types.

3. Organization of the Report

In contrast to the "Municipal Profiles" this report contains information which is summarized for each family, household and dwelling characteristic in a separate table. This data arrangement facilitates inter-municipal comparison. Alberta's data, which was added for comparative purposes, are first in each table followed by the data for the Region and the Region's municipalities. The municipalities are arranged in alphabetic order for quick reference.

ii. definitions

II. Definitions

CENSUS FAMILY

Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in most census family tables.

CENSUS FAMILY STATUS

Refers to the classification of the population into family and non-family persons.

Family persons refers to household members who belong to a census family. They, in turn, are further classified as follows:

> The terms Husband and Wife refer to persons living in the same dwelling as spouses. Persons living in a common-law arrangement are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as a husband-wife family in most of the published tables.
>
> Lone parent refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.
>
> Child refers to sons and daughters (including adopted children and stepchildren) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

Non-family persons refers to household members who do not belong to a census family. They may be related to the household reference person - Person 1 - (e.g. brother-in-law, cousin, grandparent) or unrelated (e.g. lodger, room-mate, employee). A person living alone is always a non-family person.

PRIVATE HOUSEHOLD

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

HOUSEHOLD TYPE

Refers to the basic division of private households into family and non-family households.

Family household refers to a household that contains at least one census family (e.g. persons living in the same dwelling who have a husband-wife or parent and never-married child relationship). One-family household refers to a single census family that occupies one private dwelling. The family may be that of the person responsible for household payments (primary family) or a family in which the person responsible for household payments is not a member (secondary family). A multiple-family household is one in which two or more census families occupy the same private dwelling. Additional persons may or may not be present in such a household.

A non-family household refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

HOUSEHOLD SIZE

Refers to the number of persons in a private household.

OCCUPIED PRIVATE DWELLING

Refers to a private dwelling in which a person or group of persons is permanently residing on Census Day. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing reports are for occupied private dwellings rather than unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

PRIVATE DWELLING

Refers to a separate set of living quarters with a private entrance either from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one which can be used without passing through the living quarters of someone else.

STRUCTURAL TYPE OF DWELLING

Refers to the structural characteristics and/or dwelling configuration, that is, whether the dwelling is a detached single house, apartment in a high-rise building, a row house, a mobile home, etc.

Structural Type of Dwelling - 1986 Census Publication Categories:

Single-detached House - A single dwelling not attached to any other dwelling or structure (except its own garage or shed). A single-detached house has open space on all sides, and has no dwellings either above or below it.

Apartment in a Building that has Five or More Storeys - A dwelling unit in a high-rise building which has five or more storeys.

Movable Dwelling (Comprises "Mobile Home" and "Other Movable Dwelling")

Mobile Home - A single dwelling, designed and constructed to be transported on its own chassis, and capable of being moved on short notice.

Other Movable Dwelling - A single dwelling, other than a mobile home, used as a place of residence, but capable of being moved on short notice, such as a tent, recreational vehicle, motor home, railroad car, or houseboat.

Other Dwelling - Comprises "Semi-detached House," "Row House," "Other Single Attached House," "Apartment or Flat in a Detached Duplex," and "Apartment in a Building that has Less than Five Storeys."

In this report, "movable dwellings" are included under "Other Dwellings."

In 1986, the term "single-detached house" replaces "single-detached" and "single house", as used in previous censuses.

In 1976, 1981 and 1986, the term "movable dwelling" refers to mobile homes and other movable dwellings.

TENURE

Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).
